I put my name to this motion and stand today to support it.

The straw that broke the camel's back for me was when Ms Deeming instructed that her demands must be met by 2pm or that she would and I quote "instruct my lawyers to commence legal proceedings."

When threats were made to sure the Leader, it became clear to me that the situation had reached a point where it was no longer tenable.

Others had said that this is about the rights of women. It is not.

This is about behaviour, and actions.

I understand that expulsion is a very serious sanction. It is appropriate in this instance.

This not about women. I will always support women.

It is not so simplistic to be about Moira's views on women's rights of freedom of speech. I am disappointed that despite on ongoing support assistance and that defiance and taking legal action against the leader says it all.

I understand that expulsion is a very serious sanction. It is appropriate in this instance.
