Dear All,

The shelf index vs Coles decreased by 11 bps to **99.5** this week. There hasn't been much reaction from Coles to the **'Dropped for Winter'** campaign so far.

The Aldi total index remained stable week on week at **109.7** but there was an increase in the shelf index (up 258bps to **115.6**) due to some variances in produce pricing last week.

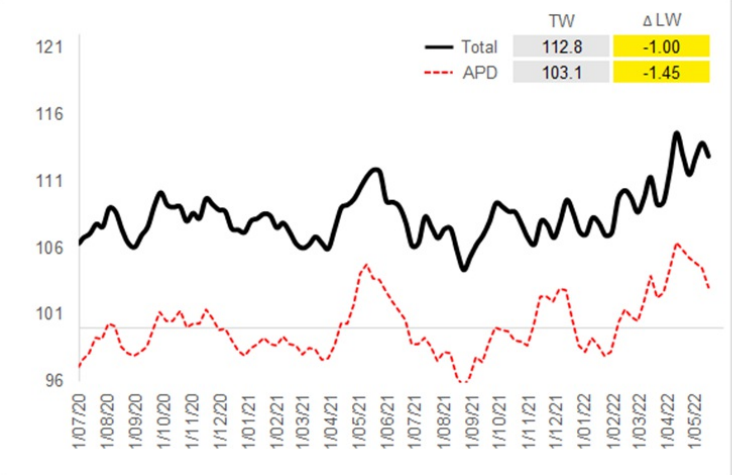

The most notable increase this week was across the Amotts range with both WW and Coles moving up in price following a cost increase.

Full details of this week's price movements can be found [here](#).
