Subject: Story straight to AVID

Hi Antony and Isaac

We've got a highly confidential and sensitive story that we're filming tomorrow. I've discussed this already with Sam who kindly ignored the fact I called him on his day off and ignored that he was on his day off.

This story won't be ingested into the Ardome system as it's highrisk. If the story was leaked early there are potential duty of care issues - so this isn't just me being paranoid - this is about duty of care. I've included Myles and Tasha our lawyers in this email.

Sam suggested we could ingest this directly into the AVID which would be terrific. Bree has organised that the tapes will come from Sydney via Dropbox tomorrow afternoon.

If there are any problems with this arrangement please call me on [REDACTED] and I'll endeavour to fix them. Bree and I will make this unusual arrangement work as smoothly as possible. The story won't be airing until at least Feb 14 - but we will want it to go into edit sooner rather than later within reason.

Best

Angus
