APPENDIX 6 – WORKLOAD STATISTICS

The statistics in this appendix provide comparative historical information on the work of the Court, including in certain areas of the Court’s jurisdiction.

When considering the statistics it is important to note that matters vary according to the nature and complexity of the issues in dispute.

It should also be noted that the figures reported in this report may differ from figures reported in previous years. The variations have occurred through refinements or enhancements to the Casetrack database which necessitated the checking or verification and possible variation of data previously entered.

Casetrack records matters in the Court classified according to sixteen main categories, described as ‘causes of action’ (CoA). The Court presently reports on filings by major CoA. This is an under-representation of the workload as it does not include filings of supplementary CoA’s (cross appeals and cross claims), interlocutory applications (initiated by the filing of a notice of motion) or Native Title joinder of party applications. In 2007–08 the Court started to count and report on notices of motion in appellate proceedings in order to provide the most accurate possible picture of the Court’s appellate workload. From 2008–09 the Court has counted all forms of this additional workload in both its original and appellate jurisdictions.

Table 6.4 on page 87 provides a breakdown of these matters. At this stage it is not possible to obtain information about finalisations of notices of motion (because they are recorded in the Court’s case management system as a document filed rather than a specific CoA). Because of this, detailed reporting of these matters has been restricted to the information about appeals in Part 3 and Table 6.4. All other tables and figures in this Appendix and through the Report are based on major CoA.
